JOURNAL of ANALYTICAL and APPLIED PYROLYSIS

Subject Index

Acetonitrile
Mass and microwave spectroscopic studies of the pyrolysis of oximes, 219
African beeswax
Principal component analysis of the pyrolysis–mass spectra from African, Africanized hybrid, and European beeswax, 251
Africanized hybrid beeswax
Principal component analysis of the pyrolysis–mass spectra from African, Africanized hybrid, and European beeswax, 251

Biomass
Catalytic coprocessing of biomass-derived pyrolysis vapours and methanol, 87
The effect of zeolite ZSM-5 catalyst deactivation during the upgrading of biomass-derived pyrolysis vapours, 65
Butyl rubber
Research trends in the degradation of butyl rubber, 111

Catalyst
Catalytic coprocessing of biomass-derived pyrolysis vapours and methanol, 87
The effect of zeolite ZSM-5 catalyst deactivation during the upgrading of biomass-derived pyrolysis vapours, 65
Certainty factors
HEPHESTUS: An expert system in PROLOG for the interpretation of the pyrolysis–mass spectra of polyesters, polyethers and polyureas using the certainty factor model, 29
Chain-scission
Research trends in the degradation of butyl rubber, 111
Chars
Microporous structure of chars produced by pyrolysis of preoxidized coals, 13
Coal
Curie-point pyrolysis of sodium salts of functionalized fatty acids, 191
Pressurized laser pyrolysis of coal, 243
Coal model compounds
Thermal decomposition of two coal model compounds — pyridine and 2-picoline. Kinetics and product distributions, 47
Coal tar pitch
Analysis of sulfur in carbonaceous compounds by laser microprobe/mass spectrometry and temperature-programmed oxidative pyrolysis, 173
Coals
Microporous structure of chars produced by pyrolysis of preoxidized coals, 13
Coprocessing
Catalytic coprocessing of biomass-derived pyrolysis vapours and methanol, 87
Curie-point pyrolysis
Curie-point pyrolysis of sodium salts of functionalized fatty acids, 191
β-Cyclodextrin
Pyrolysis–gas chromatography investigation of peralkylated β-cyclodextrins used as a capillary GC stationary phase, 181

Deactivation
The effect of zeolite ZSM-5 catalyst deactivation during the upgrading of biomass-derived pyrolysis vapours, 65
Deuterium
Pressurized laser pyrolysis of coal, 243
Duroplastic materials
Simultaneous thermal analysis/mass spectrometry and off-line combustion–gas chromatography experiments of new duroplastic materials without halogen as flame retardants, 157

European beeswax
Principal component analysis of the pyrolysis–mass spectra from African, Africanized hybrid, and European beeswax, 251
Expert system
HEPHESTUS: An expert system in PROLOG for the interpretation of the pyrolysis–mass spectra of polyesters, polyethers and polyureas using the certainty factor model, 29

Fatty acids
Curie-point pyrolysis of sodium salts of functionalized fatty acids, 191
Ferulic acid
Analysis of rice (*Oryza sativa* L.) lignin by pyrolysis–gas chromatography, 1
Flame retardants
Simultaneous thermal analysis/mass spectrometry and off-line combustion–gas chromatography experiments of new duroplastic materials without halogen as flame retardants, 157
Flash pyrolysis
Off-line thermochemolysis versus flash pyrolysis for the in situ methylation of lignin: is pyrolysis necessary?, 41

Gas chromatography/mass spectrometry
Thermal decomposition of two coal model compounds — pyridine and 2-picoline. Kinetics and product distributions, 47

Infrared spectroscopy
Thermal and chemical events in the decomposition course of manganese compounds, 265
Interpretation
A method for the interpretation of pyrolysis–mass spectra of polyesters, 127
HEPHESTUS: An expert system in PROLOG for the interpretation of the pyrolysis–mass spectra of polyesters, polyethers and polyureas using the certainty factor model, 29
Isotope labelling
Pressurized laser pyrolysis of coal, 243

Kerogen
Curie-point pyrolysis of sodium salts of functionalized fatty acids, 191

Laser
Pressurized laser pyrolysis of coal, 243
Laser microprobe analysis
Analysis of sulfur in carbonaceous compounds by laser microprobe/mass spectrometry and temperature-programmed oxidative pyrolysis, 173
Lignin
Analysis of rice (*Oryza sativa* L.) lignin by pyrolysis–gas chromatography, 1
Off-line thermochemolysis versus flash pyrolysis for the in situ methylation of lignin: is pyrolysis necessary?, 41

Manganese compounds
Thermal and chemical events in the decomposition course of manganese compounds, 265
Manganese oxides
Thermal and chemical events in the decomposition course, of manganese compounds, 265
Mass spectra
A method for the interpretation of pyrolysis–mass spectra of polyesters, 127
Mass spectrometry
Analysis of sulfur in carbonaceous compounds by laser microprobe/mass spectrometry and temperature-programmed oxidative pyrolysis, 173
Mass and microwave spectroscopic studies of the pyrolysis of oximes, 219
Thermal degradation of sulfonated poly(aryl ether ether ketone), 229
Methanol
Catalytic coprocessing of biomass-derived pyrolysis vapours and methanol, 87
Method
A method for the interpretation of pyrolysis–mass spectra of polyesters, 127
Microporosity
Microporous structure of chars produced by pyrolysis of preoxidized coals, 13
Microwave spectroscopy
Mass and microwave spectroscopic studies of the pyrolysis of oximes, 219

Nitrobenzene oxidation
Analysis of rice (*Oryza sativa* L.) lignin by pyrolysis–gas chromatography, 1

Organic sulfur
Analysis of sulfur in carbonaceous compounds by laser microprobe/mass spectrometry and temperature-programmed oxidative pyrolysis, 173

Organic sulphur compounds
A study of organic sulphur compounds in the pyrolyzate of the Vrelo kerogen (the Dinarides, Croatia), 143
Oxidation
Microporous structure of chars produced by pyrolysis of preoxidized coals, 13
Oxidative stability
Research trends in the degradation of butyl rubber, 111
Off-line combustion–gas chromatography
Simultaneous thermal analysis/mass spectrometry and off-line combustion–gas chromatography experiments of new duroplastic materials without halogen as flame retardants, 157

Paddy rice (*Oryza sativa* L.)
Analysis of rice (*Oryza sativa* L.) lignin by pyrolysis–gas chromatography, 1
PCA
Principal component analysis of the pyrolysis–mass spectra from African, Africanized hybrid, and European beeswax, 251
p-Coumaric acid
Analysis of rice (*Oryza sativa* L.) lignin by pyrolysis–gas chromatography, 1
Peralkylated β-Cyclodextrin
Pyrolysis–gas chromatography investigation of peralkylated β-cyclodextrins used as a capillary GC stationary phase, 181
Plasticizing effect
Research trends in the degradation of butyl rubber, 111
Polyesters
A method for the interpretation of pyrolysis–mass spectra of polyesters, 127
Propionitrile
Mass and microwave spectroscopic studies of the pyrolysis of oximes, 219
Pyrolysis mechanism
Mass and microwave spectroscopic studies of the pyrolysis of oximes, 219
Pyrolysis mechanisms
Curie-point pyrolysis of sodium salts of functionalized fatty acids, 191
Pyrolysis–gas chromatography
Analysis of rice (*Oryza sativa* L.) lignin by pyrolysis–gas chromatography, 1
Thermal degradation of sulfonated poly(aryl ether ether ketone), 229
Pyrolysis–gas chromatography investigation of peralkylated β-cyclodextrins used as a capillary GC stationary phase, 181
Pyrolysis–gas chromatography/mass spectrometry
Analysis of rice (*Oryza sativa* L.) lignin by pyrolysis–gas chromatography, 1
Pyrolysis–mass spectra
HEPHESTUS: An expert system in PROLOG for the interpretation of the pyrolysis–mass spectra of polyesters, polyethers and polyureas using the certainty factor model, 29
Py–MS
Principal component analysis of the pyrolysis–mass spectra from African, Africanized hybrid, and European beeswax, 251

Reaction kinetics
Thermal decomposition of two coal model compounds — pyridine and 2-picoline. Kinetics and product distributions, 47

Sodium salts
Curie-point pyrolysis of sodium salts of functionalized fatty acids, 191
Soot precursors
Thermal decomposition of two coal model compounds — pyridine and 2-picoline. Kinetics and product distributions, 47
Sulfonatedpoly(aryl ether ether ketone)
Thermal degradation of sulfonated poly(aryl ether ether ketone), 229
Surface area
Thermal and chemical events in the decomposition course of manganese compounds, 265
Synthetic polymers
HEPHESTUS: An expert system in PROLOG for the interpretation of the pyrolysis–mass spectra of polyesters, polyethers and polyureas using the certainty factor model, 29

Temperature-programmed oxidative pyrolysis
Analysis of sulfur in carbonaceous compounds by laser microprobe/mass spectrometry and temperature-programmed oxidative pyrolysis, 173
Tetramethylammonium hydroxide
Off-line thermochemolysis versus flash pyrolysis for the in situ methylation of lignin: is pyrolysis necessary?, 41
Thermal analysis
Analysis of sulfur in carbonaceous compounds by laser microprobe/mass spectrometry and temperature-programmed oxidative pyrolysis, 173

Thermal and chemical events in the decomposition course of manganese compounds, 265
Thermal analysis/mass spectrometry
Simultaneous thermal analysis/mass spectrometry and off-line combustion–gas chromatography experiments of new duroplastic materials without halogen as flame retardants, 157
Thermal degradation
Thermal degradation of sulfonated poly(aryl ether ether ketone), 229
Thermogravimetry.
Thermal degradation of sulfonated poly(aryl ether ether ketone), 229
Thermochemolysis
Off-line thermochemolysis versus flash pyrolysis for the in situ methylation of lignin: is pyrolysis necessary?, 41
trans-Nitrosoethylene
Mass and microwave spectroscopic studies of the pyrolysis of oximes, 219
4-Vinylguaiacol
Analysis of rice (*Oryza sativa* L.) lignin by pyrolysis–gas chromatography, 1
4-Vinylphenol
Analysis of rice (*Oryza sativa* L.) lignin by pyrolysis–gas chromatography, 1
Vrelo kerogen
A study of organic sulphur compounds in the pyrolyzate of the Vrelo kerogen (the Dinarides, Croatia), 143

X-ray diffraction
Thermal and chemical events in the decomposition course of manganese compounds, 265

Zeolite
Catalytic coprocessing of biomass-derived pyrolysis vapours and methanol, 87
The effect of zeolite ZSM-5 catalyst deactivation during the upgrading of biomass-derived pyrolysis vapours, 65
